

Solving Inequalities Using Multiplication or Division

Solve and graph each inequality

$$\textcircled{1} \quad \frac{y}{8} < -2.8$$

$$y < -16$$

$$\textcircled{2} \quad \frac{24}{6} \leq \frac{6m}{6}$$

$$4 \leq m$$

$$\textcircled{3} \quad \frac{-18}{-2} < \frac{-2c}{-2}$$

$$9 > c$$

$$\textcircled{4} \quad \frac{n}{-3} \geq 5(-3)$$

$$n \leq -15$$
